

# Girls' Programming Network

## *Secret Diary Chatbot!*

*In this workbook, you will make a chatbot that lets you write and read secret contents of your diary and add a password to keep it safe from nosy siblings or friends!*

**FOR TUTOR EYES ONLY**

**This project was created by GPN Australia for GPN sites all around Australia!**

**This workbook and related materials were created by tutors at:**

Sydney, Canberra and Perth

Girls' Programming Network

# Today's Project Plan:

## Secret Diary Chatbot

We'll make a computer program that lets us read and write to a secret diary file. We don't want others to read our diary so we'll protect it with a password and secret questions.

- 1 Welcome the user
- 2 Deal with if they want to read or write to the diary
- 3 Write secret messages to the diary
- 4 Read the contents of the diary
- 5 Add a secret password to the diary

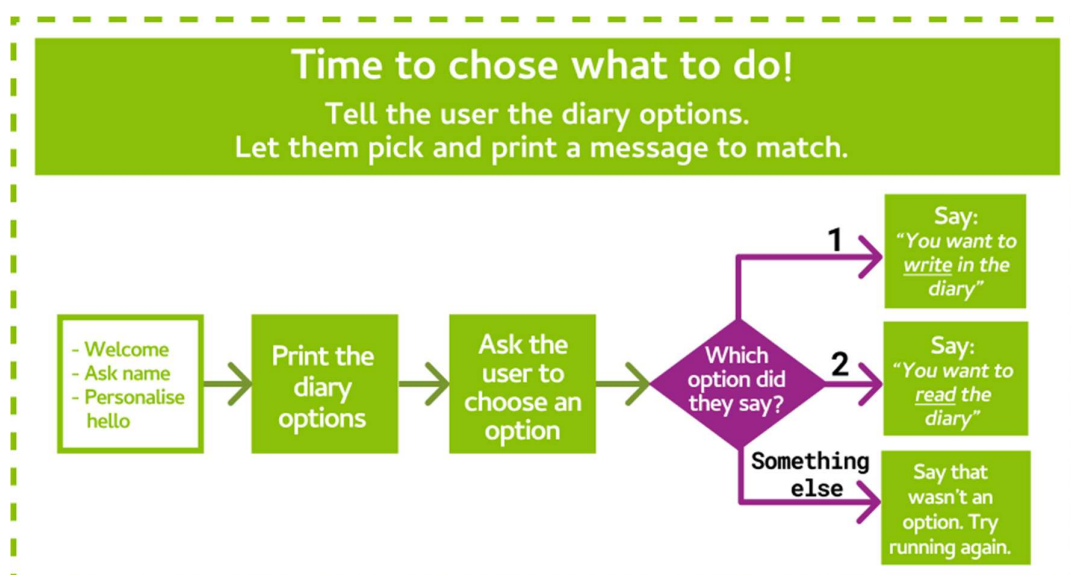

### **Once your base chatbot works add cool extensions!**

There's extensions for encrypting your data with emoji, for adding tricky maths questions to protect from little siblings, and ways to make your chatbot sassier!

# Part 1: Who are you?

| Part 1  |                           |
|---|---------------------------|
| # Imports go here                             | 1.1: Welcome the user     |
| import time                                   | Bonus 1.5: Wait a second! |
| # Main code goes here                         | 1.1: Welcome the user     |
| print("Welcome to the Secret Diary Chatbot!") |                           |
| time.sleep(0.5)                               | Bonus 1.5: Wait a second! |
| name = input("What is your name? ")           | 1.2: Identify yourself!   |
| print("Hello" + name)                         | 1.3: Personalised Welcome |
| time.sleep(0.5)                               | Bonus 1.5: Wait a second! |

## Part 2: What do you want to do?

| Part 2  |                                  |
|---|----------------------------------|
| <i># Imports go here</i>  | 1.1: Welcome the user            |
| <code>import time</code>  | Bonus 1.5: Wait a second!        |
| <i># Main code goes here</i><br><code>print("Welcome to the Secret Diary Chatbot!")</code>  | 1.1: Welcome the user            |
| <code>time.sleep(0.5)</code>  | Bonus 1.5: Wait a second!        |
| <code>name = input("What is your name? ")</code>  | 1.2: Identify yourself!          |
| <code>print("Hello" + name)</code>  | 1.3: Personalised Welcome        |
| <code>time.sleep(0.5)</code>  | Bonus 1.5: Wait a second!        |
| <code>    action = input("""What would you like to do?<br/>1) read the diary<br/>2) write into the diary<br/>3) end the program """)</code> | 2.1: Welcome to the Secret Diary |
| <code>if action == "1":<br/>    print("You want to write in the diary")</code>  | 2.2: Do you want to write?       |
| <code>elif action == "2":<br/>    print("You want to read the diary")</code>  | 2.3 Do you want to read?         |
| <code>else:<br/>    print("I don't know what you want to do! Run<br/>the program again and say either 1 to write or 2<br/>to read")</code>  | 2.4: I don't understand!         |

## Part 3: Writing in the Diary

| Part 3   |                                  |
|--|----------------------------------|
| <code># Imports go here</code>   | 1.1: Welcome the user            |
| <code>import time</code>   | Bonus 1.5: Wait a second!        |
| <code># Main code goes here</code><br><code>print("Welcome to the Secret Diary Chatbot!")</code>   | 1.1: Welcome the user            |
| <code>time.sleep(0.5)</code>   | Bonus 1.5: Wait a second!        |
| <code>name = input("What is your name? ")</code>   | 1.2: Identify yourself!          |
| <code>print("Hello" + name)</code>   | 1.3: Personalised Welcome        |
| <code>time.sleep(0.5)</code>   | Bonus 1.5: Wait a second!        |
| <code>    action = input("""What would you like to do?<br/>1) read the diary<br/>2) write into the diary<br/>3) end the program """)</code>            | 2.1: Welcome to the Secret Diary |
| <code>if action == "1":</code><br><code>    print("You want to write in the diary")</code>   | 2.2: Do you want to write?       |
| <code>    diary_entry = input("what is your message? ")</code>   | 3.1 Tell me your secret          |
| <code>    diary = open("secret_diary.txt", "a")</code>   | 3.2: Open the diary!             |
| <code>    diary_entry = diary_entry + "\n"</code><br><code>    diary.write(diary_entry)</code>   | 3.3: Writing our secrets!        |
| <code>    diary.close() #text won't be written to file<br/>    without this line</code>  | 3.4: Close the diary!            |
| <code>elif action == "2":</code><br><code>    print("You want to read the diary")</code>   | 2.3 Do you want to read?         |
| <code>else:</code><br><code>    print("I don't know what you want to do! Run<br/>the program again and say either 1 to write or 2<br/>to read")</code> | 2.4: I don't understand!         |

# Part 4: Reading the Diary

| Part 4  |                                  |

# Extension 6: It's a trap!

Sometimes siblings like to get in your stuff, so we're going to set a trap for anyone trying to sneak into our secret diary. Let's make a decoy password that shows them a fake diary if they enter it.

| Extension 6   |   |
|---|---|
| <i># Imports go here</i>  | 1.1: Welcome the user                                 |
| <code>import time</code>  | Bonus 1.5: Wait a second!                             |
| <code>password = "open_sesame"</code>   | 5.1: Let's make a password                            |
| <code>decoy_password = "abc123"</code>  | 6.1: Decoy Password                                   |
| <i># Main code goes here</i><br><code>print("Welcome to the Secret Diary Chatbot!")</code>  | 1.1: Welcome the user                                 |
| <code>time.sleep(0.5)</code>  | Bonus 1.5: Wait a second!                             |
| <code>name = input("What is your name? ")</code>  | 1.2: Identify yourself!                               |
| <code>print("Hello" + name)</code>  | 1.3: Personalised Welcome                             |
| <code>guessed_password = input("What's the secret password? ")</code>   | 5.2: What's the password?                             |
| <code>while guessed_password != password and<br/>guessed_password != decoy_password:<br/>    guessed_password = input("What's the password?<br/>")</code> | 6.2: Let them through!                                |
| <code>if guessed_password == decoy_password:<br/>    print("The secret is I like pie")</code>   | 6.3: Fake news!                                       |
| <code>else:<br/>#NOTE: everything below must be indented</code>   | 6.4: Could the real Secret Diary please step forward? |

# Extension 10: Encoding in Emoji

Right now our diary is protected from snoops when they use the chatbot, because they need the password. **But what if someone just goes and opens the text file and reads it!**  
We'll make our words unreadable by encoding them with emoji!

| Extension 10   |                                  |
|--|----------------------------------|
| <code># Imports go here</code>   | 1.1: Welcome the user            |
| <code>import time</code>   | Bonus 1.5: Wait a second!        |
| <code>password = "open_sesame"</code>  | 5.1: Let's make a password       |
| <code># Main code goes here</code><br><code>print("Welcome to the Secret Diary Chatbot!")</code>   | 1.1: Welcome the user            |
| <code>time.sleep(0.5)</code>   | Bonus 1.5: Wait a second!        |
| <code>name = input("What is your name? ")</code>   | 1.2: Identify yourself!          |
| <code>print("Hello" + name)</code>   | 1.3: Personalised Welcome        |
| <code>guessed_password = input("What's the secret password? ")</code>  | 5.2: What's the password?        |
| <code>while guessed_password != password:</code><br><code>guessed_password = input("What's the password? ")</code>   | 5.3: Guessing Game               |
| <code>time.sleep(0.5)</code>   | Bonus 1.5: Wait a second!        |
| <code>    action = input("""What would you like to do?</code><br>1) read the diary<br>2) write into the diary<br>3) end the program """)   | 2.1: Welcome to the Secret Diary |
| <code>if action == "1":</code><br><code>print("You want to write in the diary")</code>   | 2.2: Do you want to write?       |
| <code>    diary_entry = input("what is your message? ")</code>   | 3.1 Tell me your secret          |
| <code>    diary = open("secret_diary.txt", "a", encoding="utf-8")</code><br><code>diary_entry = diary_entry.replace("a", "🍌")</code><br><code>diary_entry = diary_entry.replace("b", "🍌")</code><br><code># add more replacements</code> | 10.1: Apple-ify your message!    |

|  |                                |
|--|--------------------------------|
| <pre>diary_entry = diary_entry + "\n" diary.write(diary_entry)</pre>   | 3.3: Writing our secrets!      |
